

Lesson Learned Table

Method of assessing children's learning

Teacher will assess children's learning through observations and class discussions.

Lesson Learned:

Each student created a "Lessons Learned" chart that answered the following questions:

- What new things did I learn?
- What was the most difficult thing?
- What was the most enjoyable part?
- What would I change for the next time?
- What could I have done better?

This led to sharing of each of the students' Lesson Learned charts and some additional reflections, as well as a party celebration for a project well done!
